Graduating BS Information Technology student and early-career frontend/web developer with recent internship experience at Gleent Inc. Worked on guided projects involving React, TypeScript, Python, PostgreSQL, and database-backed web applications. Gained hands-on exposure to end-to-end development, Agile-style collaboration, and independent problem solving while contributing to workflow systems, operational web apps, and tools with transcription and chat features.

SKILLS

GitHub

Frontend: React, TypeScript, JavaScript, HTML, CSS

Backend and Data: Python, Flask, FastAPI, PostgreSQL, MySQL, REST APIs

Tools and Workflow: Git, GitHub, Docker, Agile collaboration

WORK EXPERIENCE

Gleent, Inc. • Cabuyao, Philippines, 4025

January 2026 - April 2026

Web Developer • Internship

- Worked on guided internship projects involving web applications, workflow systems, and tools with transcription, chat, and automation features.
- Built and supported React and TypeScript frontend features, translating design direction into working interfaces.
- Gained hands-on exposure to end-to-end development through frontend implementation, backend-connected flows, REST APIs, and PostgreSQL-backed systems.
- Collaborated in a remote Agile-style environment and improved through mentor guidance, iteration, and independent learning.

PROJECTS

Affiliate Marketing System

January 2026

Gleent Inc.

- Affiliate management platform for signup, approval, tracking, and link generation.
- Contributed to affiliate onboarding, approval, and click or conversion tracking workflows.
- Worked with frontend and backend-connected flows for operational web application features.

Stack: React, TypeScript, Python, Flask, MySQL, Docker

AI-Powered Professional Tools Platform – IBM Dev Day BOB Hackathon Entry

May 2026 -
May 2026

- A 5-member team to build an AI-powered professional platform using IBM watsonx.ai Granite models
- Built a hybrid AI resume parser achieving 92–97% parsing accuracy with ATS scoring functionality
- Designed scalable RESTful APIs and FastAPI microservices using a layered backend architecture
- Optimized the AI resume processing pipeline to 2–4 seconds, with a 50–100ms rule-based fallback system

Fathom AI

March 2026 - March 2026

Gleent Inc.

- Video intelligence web application for transcription, analysis, and transcript-based chat.
- Worked on frontend and backend-connected flows for video handling, transcript viewing, and AI-assisted interaction.
- Helped implement features around transcription, summaries, and contextual chat experiences.

Stack: React, FastAPI, PostgreSQL, OpenAI, FFmpeg

FreshBooks

January 2026 - February 2026

OJT Project

- Web application for clients, invoices, estimates, expenses, payments, and reports.
- Contributed to a multi-module billing workflow application with record management and reporting-related features.
- Worked with React and TypeScript on the frontend while gaining exposure to Python-backed services and PostgreSQL.

Stack: React, TypeScript, Python, Flask, PostgreSQL, Docker

EDUCATION

Bachelor of Science in Information Technology in Information Technology

Pamantasan ng Cabuyao • Cabuyao City, Laguna

August 2022 - Expected June 2026
